25X1

1. On the right side of the road from Yambol to Elkhovo, there are normal telegraph poles bolted to concrete bases. Each pole has two cross-pieces, and each cross-piece carried four lines. Below the cross-pieces is a bracket carrying a single line. On the same side of the road, set in the fields about 300 meters from the road, is another line of telegraph posts, each of which has one cross-piece carrying four lines.

2. On the opposite side of the road, there is also a line of telegraph poles with two cross-pieces, each of which carries four lines. Underneath the cross-pieces four brackets are bolted, three on one side of the post and one on the other. Each of the brackets carries a single wire.
3. On this side of the road (the left from Yambol to Elkhovo), set farther back, are steel lattice pylons carrying four electric cables.
